DETAILED ACTION

Allowable Subject Matter

Claims 1-9 are allowed.

The following is an examiner's statement of reasons for allowance:

Claims 1 and 8 have been allowed over the Sarlet (6728279) and Gotoda (6690688) prior art because they fail to teach, taken singly or combined, the limitation of a multi DFB laser diode for generating a spontaneous pulse comprising first and second DFB sections including a refraction varying layer. The Sarlet prior art discloses in Fig. 1 first and second DFB sections 500 and 510 each of which has a substrate including a diffraction grating, an active layer 530 formed on the substrate, a clad layer that is formed on the active, an electrode formed on the active layer; and a phase tuning section 540, but lacks the refraction varying layer. The Gotoda prior art shows in Fig. 1A first and second DFB sections 2 and 3 each of which has a substrate 6 including a diffraction grating, an active layer 1 formed on the substrate, a clad layer 8 that is formed on the active, an electrode 14 formed on the active layer; and a phase tuning section 4, but also lacks the refraction varying layer

Claims 2-7 and 9 have been found allowable due to their dependency on claims 1 and 8.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
